### ABOUT ME

I am a software developer at EY with over 2 years of experience, specializing in web development. I have developed websites using JavaScript and automated tasks with Python. Passionate about blockchain and web 3.0, I stay updated on the latest news and trends in the industry.

### WORK EXPERIENCE

#### EY

SEPTEMBER 2022 - PRESENT

Software Developer

- Collaborated with cross-functional teams to deliver projects on time and within budget.
- Participated in code reviews and pair programming sessions to ensure high-quality code.
- Worked closely with partners to gather requirements and ensure alignment with business goals.

#### PRACTIA

JULY 2022 - SEPTEMBER 2022

Functional Analyst

- Participated in comprehensive requirements gathering sessions to document functional requirements.
- Created detailed functional specifications, use cases, and process flow diagrams to communicate requirements to the development team.

### WHAT SETS ME APART

My entrepreneurial ventures, including running a content agency and trading/investing in crypto, have equipped me with a robust set of skills that add significant value to any role. I excel at solving problems independently and thrive in dynamic environments where change is constant. These experiences have honed my ability to understand client needs, manage teams, and drive projects forward with a proactive and resilient mindset. My business acumen and ability to adapt to new challenges make me a versatile and effective developer.
